Forwarded with compliments -

The experience of the Well Boring Section in regard to Musto's plants has not been happ These sets were tried in hard rock and it is now definitely ascertained that musto's plants are not suited to drill holes through hard granite rock The soil in the Sagar Taluk consists mostly of laterite and Dr Smeeth's notes on "Underground water resources" sho that the character of the ground through which wells are sunk in that Taluk is gravel at top and white clay at bottom It is possible that the musto's hand set may prov useful in such grou d

Sir

In submitting herew th a copy of the letter c 365/28- 9 dated 2-2-1929 from the President Sagar To n Municipal ouncil together with its enclosure I have the honor to state th t the council at their meeting held on 26-1 -29 resolved to purchase for the Municipality a Mysto Patent Sand Power Well Borin achine valued at Rs 2 540/- since there i a great demand for it not onl from the residents of the Municipalit but also from those o the neighbouring villages and taluks The President reports th t the machine does not require any skilled labour for its workin and that its cost does not trench upon the budgetted items or on the reserve amount since it can be met out of Rs 2 500/- being the sale proceeds of vacant sites in the Municipality

In view of the urgent need of sinking wells owing to the approaching summer the Municipal Council have placed orders for on with Messrs Richardson and Cruddas Bombay and I request that the proposal of the Municipal Council may be kindly sanctioned at an early date

I have the honor to be
Sir
Your most obedient servant

Commissioner,
District.

b

Letter No 365/28-29 dated 2nd February 1929 from the President, Town Municipal Council Sagar to the Deputy Commissioner Shimoga District

****

In enclosing herewith the copy of the resolution of the Municipal Council Sagar regarding the purchase by the Municipality of a Well Boring Machine I have the honor to state that in view of the water scarcity felt in the town year after year by the drying up of most of the wells during summer and the contamination of water in wells the Municipal Council thought it desirable to order a Boring Machine to obviate the difficulties both in the matter of cost and delay in sinking fresh wells and the contamination of drinking water in the existing wells

In view of the urgent need for sinking fresh wells in the town the Municipal Council have placed orders with Messrs Richardson & Cruddas Bombay for a Musto Patent Hand Power Well Boring Machine priced at Rs 2 540/ The working of the machine is very simple and does not require any skilled labour

Cheapness of cost quickness of execution unfailing supply of water freedom from contamination scope for deepening existing wells without disturbing the existing revetment easy transportability are some of the features of the Boring Machine The wells bored by similar machines in places like Sirsi and Hirekerur have proved satisfactory and very cheap The purchase of the machine will not involve any trenching on the budgeted items of expenditure The working of the machine is expected to bring in a 50/ net return to the Municipality calculating the hire to be charged to works @ Re 1/- per foot sunk on a basis of a similar charge in respect of machines in operation at Sirsi and Hirekerur

It is estimated that 12 wells of 100' depth can be sunk in a year at a cost of not more than Rs 400/- a well at the outside The whole of the recurring cost of the establishment etc , will

& above is

is exclusive of 5% interest on the capital outlay There is a very great demand for the machine not only from the inhabitants of the town but those of neighbouring villages and Taluks so th t it is sure that the machine will be fully utilized The working of the machine will therefore supply a long felt want and will overcome most of the difficulties met with under the present system of sinking wells including the prohibitive cost of labour in these parts The proposal is highly beneficial as well as remunerative as explained above The Municipality are very hopeful of the successful working of the plant

I therefore request you to kindly move the Government to approve the action taken by the Municipality to purchase the Boring Machine and also to request the Director of Industries and Commerce to address the local Superintendent of Industries to test the machine on its arrival

****
